

IN THE CLAIMS:

Please amend the claims as follows:

Sub C2
1. (Amended) A data processing system for evaluating treatment of chest pain patients in a medical facility, the system comprising:

a
means for entering chest pain patient treatment information;

means for storing the chest pain patient treatment information;

means for retrieving the chest pain patient treatment information;

means for comparing the chest pain patient treatment information to predetermined values to evaluate the treatment received by chest pain patients; and

means for reporting the comparison of the chest pain patient treatment information to the predetermined values to evaluate the treatment received by chest pain patients, so that the medical facility is able to improve its treatment of chest pain patients.

Sub C3
5. (Amended) A data processing method for evaluating treatment of chest pain patients in a medical facility, the method comprising:

a2
entering chest pain patient treatment information;

storing the chest pain patient treatment information;

retrieving the chest pain patient treatment information;

comparing the chest pain patient treatment information to predetermined values to evaluate the treatment received by chest pain patients; and

reporting the comparison of the chest pain patient treatment information to the predetermined values to evaluate the treatment received by chest pain patients so that the medical facility is able to improve its treatment of chest pain patients.
